EDUCATION

Siddaganga Institute of Technology, Tumkur
Bachelor of Engineering in Computer Science and Engineering (AI & ML)

Aug 2023 – Jul 2027
CGPA: 9.12

Vidyaniketan PU College
12th

Jun 2021 – Jun 2023
Percentage: 96%

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, SQL
- **Core CS:** Data Structures and Algorithms, Operating Systems, OOP, DBMS, Computer Networks
- **Backend:** FastAPI, REST APIs, Authentication (JWT/OAuth), Microservices, Docker, Linux
- **Databases & Data:** PostgreSQL, MySQL, SQL Server, Redis, ChromaDB, ETL Pipelines
- **Tools:** Git, GitHub, Linux, VS Code
- **AI/ML:** Machine Learning, Reinforcement Learning, LangChain, Scikit-learn, TensorFlow, RAG, Feature Engineering

SOFTWARE ENGINEERING EXPERIENCE

Data and Analytics Intern, HEXANGO PVT LTD

Jan 2026 – May 2026

- Led migration of enterprise database from **AWS RDS SQL Server** to **PostgreSQL**, handling 50+ tables and 200+ stored procedures.
- Designed and implemented ETL pipelines within Scrum development cycles, participating in sprint planning, daily stand-ups, testing, and reviews to ensure data consistency and integrity.
- Re-engineered T-SQL procedures into optimised **PL/pgSQL**, improving performance and maintainability of backend workflows.
- Built a Python-based synthetic data generator producing **250K+ relational records** with full referential integrity.

PROJECTS

Distributed Web Scraper Platform — *Python, FastAPI, Redis, PostgreSQL*

[GitHub](#)

- Designed a distributed, asynchronous scraping platform using FastAPI, Redis Queue, and PostgreSQL for scalable background job processing.
- Developed REST APIs for job submission, status tracking, and result retrieval with worker-based execution.

NeuroMentor Adaptive Learning Platform — *Python, FastAPI, Reinforcement Learning*

[GitHub](#)

- Developed a scalable backend using FastAPI with secure JWT-based authentication and RESTful APIs.
- Engineered an adaptive recommendation system using Reinforcement Learning to dynamically personalise learning content. Integrated LLM APIs for real-time content generation with robust error handling and response validation.

Dual Insight RAG Engine — *Python, LangChain, ChromaDB, Streamlit*

[GitHub](#)

- Built a Retrieval-Augmented Generation (RAG) system for semantic search and dual-document comparison using LangChain and ChromaDB.
- Optimised document retrieval latency while achieving 92% retrieval accuracy on large document datasets.

ACHIEVEMENTS

- Solved **400+** problems on **LeetCode** across Arrays, Sliding Window, Trees, Strings, Graphs, Greedy algorithms.
- Hackathon: **1st Prize** Open Innovation Track at **48-hour NMIT National Hackathon 2025** among 300+ participants for an AI civic solution.
- Pitchathons: **1st Prize** in **SIT Pitchathon 2025** and **SIT Pitchathon 2026** for presenting Smart Dustbin AI-powered recycling with real-time object detection.

LEADERSHIP

Operations Lead - AI Brewery

Aug 2024 – Present

- Spearheaded the end-to-end execution of **national-level hackathons** and technical workshops, managing 50+ diverse teams and **200+ participants**.
